WORK EXPERIENCE

Web Developer

Digital Ambar

2023-2024

- Developed a website using Bootstrap, HTML, CSS, and JavaScript for the frontend, and Django for the backend.
- Conducted analysis of the website's requirements.
- Created flowcharts using Visio to outline the workflow; designed wireframes using Figma for the user interface.
- Integrated email services using Useinbox for streamlined communication.
- Implemented location-based smart search using map services like Google Maps.
- Integrated authentication services such as Google and Facebook for secure login processes.

Data Science Intern

B2metric

2022-2023

- Utilized Beautiful Soup for web scraping to extract data from websites and transfer into PostgreSQL for storage and organization.
- Developed machine learning models and contributed to their improvement.
- Conducted queries using BigQuery to retrieve data necessary for model training.
- Observed and studied churn analysis methods, determining how to extract the required data for the models.

PROJECTS

Musicfy:Music Listening App with Recommendation System

Musicfy is a music application with a Spotify-like interface developed using Django. It offers personalized recommendations through both user-based and item-based approaches.

Günyap Grup

The project entailed developing a dynamic website for a electricity company, empowering them to regularly update and manage their content, showcasing projects, services, and certificates efficiently.
